The morphologist considers his earlier work the most important; the geologist, that his reputation rests chiefly on his extensive investigations of coral reefs; the zoologist remembers his vast collections of marine life gathered in a dozen extended voyages widely scattered over the surface of the globe; and, to still others he appears as the creator of a vast museum and one of the greatest benefactors of the oldest university in America; while those who delve among ancient civilizations and primitive races might well be surprised at the extent of his poaching in their preserves, a mere detour in his many wanderings in the pursuit of science or search of health. In the world of affairs he was known as an extremely capable and successful mining man, who was said to employ his leisure moments in some sort of scientific study. When I first began to collect material for a life of my father, I hoped that it would be possible to tell it in his. own words. But grave objections to such a plan soon appeared; one of the foremost being the mysterious disappearance of most of his later correspondence with his stepmother.
