Reviews

Without doubt, this is actually the best job by any publisher. It is written in basic phrases instead of difficult to understand. You will like the way the author publishes this publication.

This report further highlights the development of dynamic planner by incorporating Monte Carlo simulation techniques into situations with uncertainties. 1. 2 Outline of Report This project report is organized as follows: Chapter 2 presents a literature survey on planning and scheduling techniques for possible technology transfer into telerobotic applications. Chapter 3 presents the development of a conceptual model for planning in a telerobotic system. The concept presented is both generic and open-ended for understanding knowledge requirement in modeling teleoperation. Chapter 4 presents a task planning technique for a telerobotic environment. The methodology lies primarily on task consideration and resource needs in planning a multi-agent system. Chapter 5 presents a model for scheduling resources in a telerobotic system. A heuristic algorithm that employs results from the planning is discussed. Chapter 6 presents some sample applications in aircraft turnaround functions and simple block-world assembly problems respectively. Chapter 7 concludes the project report with a summary of what has been accomplished and a discussion of the directions for future work in planning multiagent systems with human-machine interaction in mind.
