

Treatise on Natural Philosophy Volume 1, PT. 2 (Paperback)

Filesize: 5.32 MB

Reviews

An incredibly great book with perfect and lucid answers. Better then never, though i am quite late in start reading this one. You will not sense monotony at whenever you want of the time (that's what catalogues are for relating to if you question me).

(Nannie Lindgren Jr.)

Not illustrated. 1883 Excerpt: .method of Fourier, he solves (12), subject to the surface equation (18), for the particular case of a rectangular prism. (A.) For this M. de St Venant finds a general integral of the boundary condition, viewed as a differential equation in terms of the two variables x, y , thus: --Multiplying (18) by ds , and replacing $\sin \theta$ and $\cos \theta$ by their values dy and $-dx$, In this the first two terms constitute a complete differential of a function of x and y , independent variables; because y satisfies (12). Thus, denoting this function by u , we have---and $u = -\frac{1}{2} \frac{dx^2 + dy^2}{r^2}$ (20) $dx dy dy dx$ and (19) becomes $du - r d(x + iy) = 0$, which requires that $u - t(x + iy) = C$ (21), for every point in the boundary. It is to be remarked that, because $d dy d dy dx dy dy dx$ we have, from (20), $+ = 0$ (22); or u also, as y , fulfils the equation $\nabla^2 u = 0$. A function, algebraically homogeneous as to x, y , which satisfies this equation is Appendix B. (a) a spherical harmonic independent of z . Hence a homogeneous solution of integral degree i can only be the part of Appendix B. (39) not containing s . This is $C_i + G r^i$, where Appendix B. (26) $= x + vy$, and $ij = a; -vy$, v standing for $J-1$; or, if we change the constants so that the constants may be real, $A(x + vyy + (x-vy) - vB(x + vyy - (x-vy) (23), or,...$
