

## Elements of Geometry, with Trigonometry (Paperback)

Filesize: 9.7 MB

### ***Reviews***

*Unquestionably, this is the finest function by any article writer. I have read and that i am confident that i am going to likely to read yet again once again later on. Your daily life period will probably be transform when you comprehensive reading this article book.*  
*(Sheldon Aufderhar)*

## ELEMENTS OF GEOMETRY, WITH TRIGONOMETRY (PAPERBACK)

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1872 edition. Excerpt: .in the polygon. A regular polygon of 360 sides would, therefore, divide the circumference into arcs of 1; but 360 does not occur in any of the above series, nor is there any elementary method of trisecting the arc of 3 subtended by the side of a regular polygon of 120 sides. Hence, though many multiples of the unit arc are easily determined, the unit arc itself, so important in the construction of mathematical and astronomical instruments, must be determined by approximation. S IV. A regular polygon being inscribed in a given circle, to circumscribe a similar regular polygon about the same circle. At the vertices of the angles of the regular inscribed polygon ABCDEF (Fig. 89), draw the tangents PH, HK, KL, c, and the circumscribed polygon which they form is similar to the inscribed polygon. For since AF = AB = BC. and the angle AFP = FAP = BAH = ABH., all being angles which are N( measured by the halves of equal arcs (39), therefore the triangles FPA, AH.B, BKC. are isosceles and equal. Hence FP = AP = AH = HB., and the angle P = H = K. Consequently the circumscribed polygon is regular, and, having the same number of sides, it is similar to the inscribed polygon. Tangents drawn at the middle points of the arcs AF, AB, c, will be parallel to the chords, and will also form a regular circumscribed polygon similar to the inscribed one. The converse problem of...
