

Green Infrastructure for Landscape Planning: Integrating Human and Natural Systems (Hardback)

Filesize: 8.78 MB

Reviews

Absolutely among the best book We have ever study. It is actually writter in easy words instead of hard to understand. I found out this publication from my i and dad encouraged this book to find out.

GREEN INFRASTRUCTURE FOR LANDSCAPE PLANNING: INTEGRATING HUMAN AND NATURAL SYSTEMS (HARDBACK)

Taylor Francis Ltd, United Kingdom, 2014. Hardback. Book Condition: New. 249 x 173 mm. Language: English . Brand New Book. Green infrastructure integrates human and natural systems through a network of corridors and spaces in mixed-use and urban settings. Austin takes a broad look at green infrastructure concepts, research and case studies to provide the student and professional with processes, criteria and data to support planning, design and implementation. Key topics of the book include: * The benefits of green infrastructure as a conservation and planning tool * Requirements of ecosystem health * Green infrastructure ecosystem services that contribute to human physical and psychological health * Planning processes leading to robust green infrastructure networks * Design of green infrastructure elements for multiple uses. The concept of ecosystem services is extensively developed in this book, including biological treatment of stormwater and wastewater, opportunities for recreation, urban agriculture and emersion in a naturalistic setting. It defines planning and design processes as well as the political and economic facets of envisioning, funding and implementing green infrastructure networks. The book differs from others on the market by presenting the technical issues, requirements and performance of green infrastructure elements, along with the more traditional recreation and wildlife needs associated with greenway planning, providing information derived from environmental engineering to guide planners and landscape architects.
