RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Original publisher: Asheville, N. C. : U. S. Dept. of Agriculture, Forest Service, Southeastern Forest Experiment Station, 1990 OCLC Number: (OCoLC)21916326 Subject: Timber -- United States -- Marketing. Excerpt: . . . through different mechanism and land is an assessment by incorporating econometric demand timber producers, and thus endogenous variable for models in a market-simulating objective function. should be directly incorporated in timber market This specificity allows the direct analysis of a wide analyses. These adjustments are especially important variety of questions about optimal investment levels in the Southern United States where competing land under varying condition for various classes of uses will have an important bearing on future forestry aspect of this ownerships. Another important production. modeling approach is that, unlike econometric models, it provides a framework for simulating production in new policy environments. Application to forestry has likely been hampered by the intertemporal nature of Timber Market Structure timber production. However, decomposition methods and recursive programming offer possibilities for coping with this problem (Duloy and Norton 1975). Competitive market models assume several perfects. The competitive market equilibrium requires perfect and symmetric information...
